

## **Wallace Farm Common Ground Committee Meeting Minutes**

September 12, 2016

6:30 pm

### **Members Present:**

Joe Neely  
Joel Belliveau  
Tony Galligher  
Steve Barnhardt  
Terry Renegar  
Tina Williams  
Ted Randolph  
Dean Lentz  
Larry Barnhardt  
Eric Wallace  
Jason Watkins

### **Members not present:**

Brooke Preslar

### **Business:**

- Eric Wallace, President of Wallace farm presented the agenda, which is incorporated herein for reference.
- The committee plans to meet quarterly or as needed to address issues from the Davie Co operations.
- Wallace Farm removed a feed stock (feedstock #1) in late July which was believed to be causing extreme odors. This feedstock has been getting worked through the process and should be completely through the composting process the week ending 9-24-16.
- Wallace Farm has identified a second feedstock (feedstock #2) as a potential to cause odors. The customer of WF has been notified this feedstock will no longer be accepted by WF. WF believes it will take thirty days for their customer to reconfigure logistics and send this product somewhere other than WF. Based on the estimated timeline, WF will not receive feedstock #2 beyond 10-12-16. As with feedstock #1, it will take several weeks for feedstock #2 to work through the composting process.
- Wallace Farm is covering all windrows with carbon material immediately after the windrows are turned. An additional full time employee was hired to cover windrows. This process has been in place since early August 2016.
- Wallace Farm is actively exploring additional alternatives to mitigate and control odors including a mobile or perimeter 'vaporization' system. The consulting engineer is to meet with WF on Monday, 9/19, to explore further solutions and possible timeline for testing.

**Meeting Adjourned at 8:15 pm**
